## Employee Spotlight: Dalton Scott

Dalton Scott is Rock Harbor's new Tournament Director and Director of Player Development. Dalton has a long list of accomplishments and some fun facts we would like for you to know about him.

**Work History and Experience:**  
Windermere Country Club, FL  
Kiln Creek Golf Club and Resort, VA  
Fords Colony County Club, VA  
Stonecrest Golf Club, VA

**Education:**  
Tabbs High School, Yorktown , VA  
Professional Golfers Career College,  
Orlando, FL

**Fun Fact:**  
Dalton had the rare opportunity to shadow Sean Foley for 1 year.

**Career Goals:**  
Dalton has a passion for teaching. He is very excited to begin building our youth and junior program at RH. He wants to visit with high schools and begin a more intense junior program that teaches not just golf skills, but life skills, such as honesty, integrity and respect. Dalton believes that all life skills can be taught in and through golf.

**Birthday:**  
November 27

**Travel:**  
Dalton recently returned from a golfing trip to Scotland, where he played St. Andrews.

***“No one should teach who is not in love with teaching”***

# Rock Harbor News

What is the most troublesome tree at RH?

No. 5 Rock. The vote was unanimous. The tree that sits in the fairway of No.5, this tree gives people the most trouble of any tree on the course. Several years ago when a mini-burst hit the course, we almost lost this tree, to the glee of some golfers, but it came back stronger than ever and still stands as a constant irritation to many golfers.

Happy  
Thanksgiving

## BEFORE and AFTER

This months *Before and After* picture was a little difficult. Here is the story behind the picture from Denny Perry:

Boulder 16 Green looking North West. While I was building this green I had the water fall almost complete when a large storm came and undermined the boulders I had been carefully placing to create the waterfall. The storm caused the boulders to wash out and collapse. That cost me about two weeks worth of work! Each stone had to sit just right so the water would flow from rock to rock to rock and so on. So the rocks you see sitting in the pond on the before picture are now part of the waterfall flowing into the pond.

During the construction process there many washouts. Another one happened on hole number four, Rock. We had to seed and re-seed the fairway four times. Another one was on Rock 17. We sod planted the hill between the green and the green tee box. After a big storm all the sod washed down the hill and was in a big pile in the front bunker.

Sometimes, Mother Nature was not my best friend.

*12 Rock*
