Fresh From The Grill

Beau Rudiger,
RH Grill Manager:

Hello June!! May left us with a washed-out month. June is *Member/Guest* month, make sure you sign up if you want to play.

What a great weekend. I want to wish all Fathers a Happy Father's Day!!

We have added several new pizzas to the flat bread menu and a great version of Nachos with queso cheese, Taco meat, lettuce, tomatoes, onions, jalapeños, and sour cream. If you like nachos, try them; they're outstanding.

We held a Brunch in May and most of my specials

were very well received. I will host another Sunday event in June to try it again. It will probably be different hours, featuring a few of the specials from the brunch and these items will definitely be available during the *Member/Guest* breakfast.

I have a good portion of the *Member/Guest* Friday Dinner Menu planned. We're looking at hand carved Filet Mignon, carved Prime Rib, Pork Tenderloin and a Seafood entree that has not been confirmed yet on quantity or pricing. Of course, we'll have scalloped potatoes, mashed potatoes, and fresh green

beans. We will also set up an area for a Make-Your-Own Salad and another area for Shrimp Cocktail. I'm working on desserts, but I know Strawberry and Brownie Parfaits will be available.

One more item I need to bring up: **as a member you must sign your charged ticket every time you are charging items. It must be closed before you leave. We are entering the busy season, and I won't have time to review video footage to identify who the charge belongs to. It's your responsibility to keep your accounts accurate.**

The Green

Chris Dieter, Course Superintendent:

My main thought for this newsletter is "it finally rained, and rained, and rained." For any one that was unaware we were in a drought, luckily, we had not been put on any water restrictions. Even though we have 2,000 sprinklers to cover the course, nothing waters as well as rain. Aside from a few downpours, the rain we have had has been perfect, mainly slow soaking rain.

As we go through a draught, we are constantly complaining about the lack of rain, then it comes, and we are cart path only and can barely get anything mowed. So, I prepared for the typical golfer questions.

- What is the black fungus on the greens?
⇒ This is not a fungus it is actually algae, which is due to the high amounts of rain. We do have some chemistry, which will help eliminate it. You may also see us aerifying with needle tines to assist in drying the algae.
- What are the dark green grass rings with mushrooms growing in them?
⇒ These rings are Fairy Rings. Sometimes they can cause the soil to become hydrophobic. Fairy Rings grow in diameter and there are some in the Midwest that have been measured in miles. There are also mythical stories which surround them.

Algae Boulder 8 Green

Rock 5 Fairy Ring

Rock 4 Fairy Ring

- What are the purple flowering trees by Boulder 11 tee?
⇒ This is a Paulownia Princess Tree or an Empress Tree, pictured right. This tree is an invasive species. It is grown in Germany and some other countries for timber. This tree has a high growth rate and can be harvested in three years.

- What are the red flowers growing in the rocks on Boulder 6?
⇒ These are wild Columbines. If you watch some of the rocky spots around the course, you may see more.
